The screenshot shows the myCompiler website interface. At the top, there's a title bar with browser tabs and a search bar. Below that, the myCompiler logo is on the left, and navigation links (English, Recent, Login, Sign up) are on the right. A text input field for a title is present. Below the title field, there's a dropdown menu for the database (MySQL) and an information icon. The main area is a code editor with a light blue background, showing a MySQL query: `SELECT country, AVG(sales) AS avg_order_value FROM amazon_sales GROUP BY country;`. To the right of the code editor is an output panel with a green 'Run' button and a blue 'Save' button. The output panel displays the results of the query execution:

country	avg_order_value
USA	64.97000122070312
UK	85.9749984741211
India	53.65000089009603
Germany	25.2450008392334

. Below the output, it says '[Execution complete with exit code 0]'. At the bottom right, there's a small advertisement for 'ADS VIA CARBON'.
